

Cómo configurar la integración en Tilda

A continuación, debe editar las fichas de producto en Tilda. Para configurar una tienda en línea de cursos desde cero, siga esta [guía paso a paso](#).

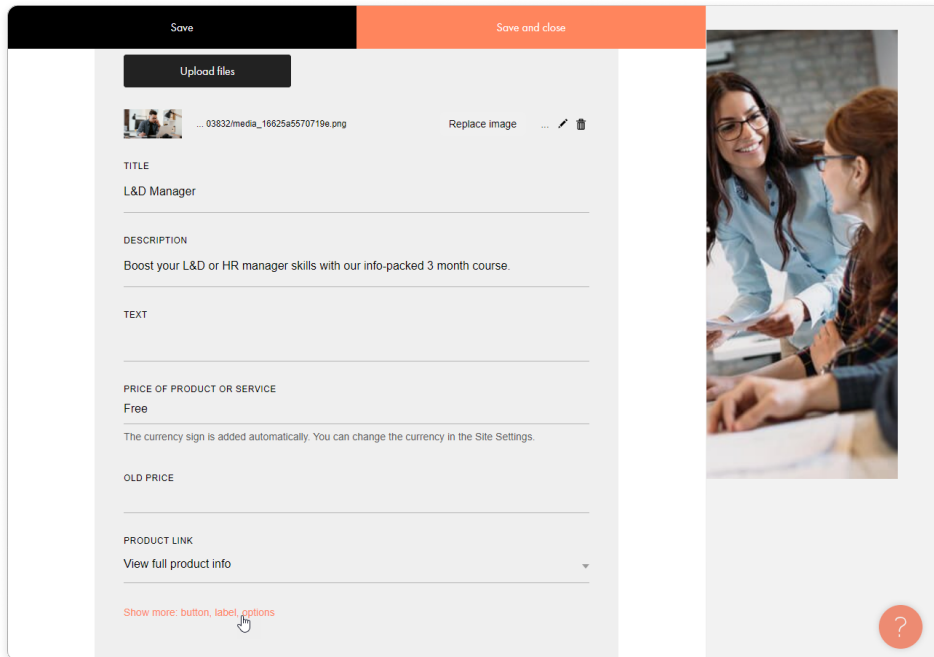

1. Vaya a [Tilda](#) y añada fichas de producto a su sitio web.

2. Una vez que haya añadido las fichas, haga clic en **Content (Contenido)**.

3. En la ficha del producto, haga clic en **Show more: button, label, options** (Mostrar más: botón, etiqueta, opciones).

OPTION NAME

5. A continuación, añada el webhook de iSpring LMS a Tilda. Para ello, vaya a **Site Settings** (Ajustes del sitio) > **Forms** (Formularios) > **Other** (Otro) y haga clic en **Webhook**.

Other

Email through SendGrid

Send form submissions to your email through SendGrid

Slack

Send form submissions to Slack

Webhook

Send form submissions to your own script

Zapier

Send form submissions to Zapier

6. Pegue el enlace de iSpring LMS en la URL del webhook.

7. Haga clic en **Add (Añadir)**.

Data collection setup: Webhook

Learn more about [Webhook](#).

WEBHOOK URL

https://tilda-integration.ispringlearn.com/api/add_student/c

Please enter the script URL to receive form submissions.

API METHOD

Off

Do I need to pass the API key to the webhook and, if necessary, by what method (Header, Post)

ADDITIONAL SETTINGS

☐ Send Cookies

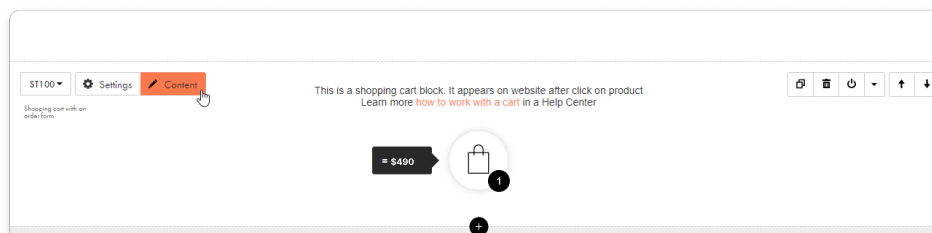

☐ Transfer data for goods in the order - as array

☐ Send only after payment

Close

Add

8. Añada un bloque de carrito de compra y vaya a **Content (Contenido)**.

9. Seleccione **Webhook** en **SERVICIOS CONECTADOS**.

Save

Save and close

Use blocks from the "Store" category with a Shopping Cart. You can also set product order action for any block - enter a link like: #order:productName=price. E.g., **#order:Headphones=499**

Assign payment system or set currency in Site Settings

Learn how to work with a cart in our [Help Center](#) .

FORM DATA RECEIVER

Submitted data is stored in the **Leads section** of the project. You can also connect data collection services integrated with Tilda.
